EDUCATION

Jaypee Institute of Information Technology, Noida

06/2023 – 05/2027

Bachelor of Technology – Computer Science and Engineering

- **Coursework:** Object-Oriented Programming, Data Structures, Algorithms, Operating Systems, Software Engineering, Database Management Systems, Computer Networks

EXPERIENCE

CodTech IT Solutions  | Frontend Web Development Intern

May 2026 – July 2026

- Developed a responsive **project management dashboard** using **ReactJS** and **Tailwind CSS** for managing projects, tasks, deadlines, and team workflows.
- Implemented an interactive **Kanban board** with drag-and-drop task management, task filtering, priority tracking, and reusable React components for a scalable UI.
- Built interactive **analytics dashboards** using Recharts to visualize project progress, task completion, and team productivity with responsive layouts for desktop and mobile.

Freelance – SECTET Remote | ReactJS, Node.js, Express, MongoDB

Dec 2025 – Jan 2026

- Engineered **3+ encryption and decryption mechanisms** to secure sensitive user communication and protect application data.
- Developed reusable **cryptographic backend modules** and integrated them with **Node.js/Express REST APIs** for secure data transmission and storage across multiple endpoints.
- Implemented and tested secure **encryption, decryption, and data validation workflows**, ensuring data integrity while maintaining modular and maintainable backend architecture.

PROJECTS

JIITCommute – Campus Ride Sharing App | ReactJS, Node.js, Express, MongoDB

- Developed a full-stack **campus ride-sharing platform** using ReactJS, Node.js, Express, and MongoDB with secure **JWT authentication** and OTP verification.
- Integrated **real-time messaging using Socket.IO WebSockets** and designed scalable **REST APIs** for ride listings, trip requests, user management, and trip coordination.

FruitAI – Fruit Ripeness and Disease Detection System | Python, TensorFlow, YOLOv8, Streamlit

- Developed an AI-powered **fruit analysis system** using **MobileNetV2 transfer learning** and **YOLOv8** to classify fruits, estimate ripeness, and detect visible diseases.
- Built a hybrid **computer vision pipeline** combining CNN-based classification, object detection, and image-based ripeness scoring with an interactive **Streamlit dashboard**.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript, PHP

Web Technologies: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Databases & Backend: Node.js, Express.js, MongoDB, Firebase, REST APIs, Authentication, JWT, WebSockets

Cloud/DB: MongoDB Atlas, MySQL, Vercel, Render

Development Tools: Git, GitHub, Linux/Unix, Postman, VS Code

ACHIEVEMENTS & CERTIFICATIONS

- **2nd Runner-Up – HyperSprint Hackathon** | Organized by HyperDart
- **Champion – Intra-College Football Tournament (FSM – Fun Sports Meet), April 2025**, securing the tournament title through strong **teamwork and coordination**.
- **Competitive Programming Achievements** | Solved **100+ problems** across [Codechef](#) and [LeetCode](#)

LEADERSHIP & MENTORSHIP

- **Management Head, AITronics** — Led the “*Innovate 1.0*” event and “*SummerHack*” hackathon, overseeing end-to-end planning and execution for **100+ attendees** and **30+ participants**
- **Tech Volunteer, IIIT Optica Chapter** — Supported event operations by developing the [JSCOP](#) website
